

EXECUTIVE BIOGRAPHY

Mark Flegg

Mark Flegg, **CSC** global director of security services, is responsible for advising a global client base on digital risk and the preventative measures brands can take to safeguard their digital assets. During his 18-year career, Mark has acquired a wealth of experience in cyber security technology focusing on domain management systems, domain name systems (DNS), digital certificates SSL (TLS), and distributed denial of service protection software and mitigation.

To raise awareness of digital threats to businesses, Mark regularly presents programs dealing with domain security and cyber security assets at leading industry conferences and events.
