CSC

EXECUTIVE BIOGRAPHY

Fernando Cevallos

Fernando Cevallos joined **CSC** as the lead anti-fraud developer in 2019. In this role, he brings proven skills in new technology and fraud prevention.

A senior anti-fraud engineer for 10 years, Fernando started his software developer career in 2005 using .Net and Java programming languages. He joined a large brand protection company as a junior anti-fraud engineer working on fraud detection and mitigation technologies, and was promoted to senior SOC engineer. This position allowed him to fully understand fraud and all the threat vectors this field encompasses while learning PHP and Python programming languages for tools development. Fernando is eager to introduce concepts that will push CSC to become the lead anti-fraud service company in the world.

Fernando attended The University of Maryland Global Campus for computer science information systems and the Catholic University in Ecuador for computer science engineering.
